Passport Report

A Summary of Demographic Characteristics, Enrollment Trends and First Year Outcomes among Students Who Have Attended both Ivy Tech Community College-Central Indiana (ITCI) and IUPUI

Prepared by the IUPUI Office of Information Management and Institutional Research (IMIR)

October 1, 2013
IUPUI Students Who Previously Enrolled at Ivy Tech-Central Indiana, Fall 1993-2013

The number of IUPUI students that have previously attended ITCI has dropped slightly over the past year; however, this may be due to the change in timing of the data retrieval. In previous years, the data was collected for the prior fall semester. This year, we are collecting data for the current fall semester. Since much of the data is pulled from dynamic tables, this does result in slightly lower totals.

Number of Students and Credit Hours

Average Transfer Credits
Enrollment Status and Demographic Profile of IUPUI Students Who Previously Attended Ivy Tech-Central Indiana, Fall 2013

Compared to the overall IUPUI undergraduate student body, IUPUI students who previously attended ITCI are less likely to enroll on a full-time basis. ITCI transfers to IUPUI include a notably higher percentage of minority students, particularly African American students. The gender distribution of ITCI transfers is similar to that of the general IUPUI undergraduate student population.

The number of IUPUI students who previously attended ITCI constitutes 18 percent of IUPUI's overall undergraduate enrollment. Most notably these students also contribute 24 percent of IUPUI's overall undergraduate ethnic diversity.

Note: Students are identified by last institution attended. Includes all new students classified by IUPUI as transfers. Some transfers may have attended additional institutions. In addition, not all credit hours are submitted to IUPUI in a given year.

Once again, it is important to note the slight decrease due to the change in timing for gathering the data. Overall, the percent of students transferring credits has stayed the same, and the average credits transferred has been roughly the same as well.
Ivy Tech Community College is without question IUPUI's largest transfer feeder institution. Transfer students from Ivy Tech Community College as a group transferred more credits than students from any other external institutions. Moreover, as a result of articulation agreements between the two institutions, approximately 7.7 out of 10 credit hours transferred from the Central Indiana region of Ivy Tech Community College are articulated towards distributed credits, that is, credits that have been equated to a specific IUPUI course. In comparison, only about 60% of transferred credit hours are articulated toward specific course credits for students from IUPUI's other major feeder institutions.

**Distributional Articulation of Accepted Transfer Credits from IUPUI's Top Feeder Institutions, Fall 2013**
Students who transferred from Ivy Tech-Central Indiana to IUPUI in Fall 2012 as freshmen attained slightly lower than average grades in their first year at IUPUI compared to all external transfers. Ivy Tech-Central Indiana’s one-year retention rate is the lowest, but the overall totals from each institution are rather low and the averages could fluctuate greatly with just a few additional students.

</table>

Note: Students are identified by their last institution attended.

**Results for all beginning freshmen are provided for comparative purposes.
Among students who began at IUPUI with sophomore class level standing in fall 2012, the average first-year GPA for Ivy Tech-Central Indiana transfers was among the lowest of the major feeder transfer institutions and lower than the average for all external transfers. Ivy Tech-Central Indiana was also the lowest for one-year retention rates among the major feeder institutions.

Comparative Performance of New Transfers at IUPUI
Fall 2012 New Transfers with Junior and Higher Class Level Standing

Among students who began at IUPUI with junior or higher class level standing, the average first-year GPA for Ivy Tech-Central Indiana transfers was the second highest among major feeder transfer institutions, and slightly above the average for all external transfers. Students from Ivy Tech-Central Indiana also had the second highest one-year retention rate among the major feeder institutions. Interesting to note, new transfers with junior and higher class level standing showed better performance than those transferring in with either a freshman or sophomore class level standing.
