I am attaching copies of the last two sets of enrollment planning summaries that came out of the Enrollment Management Group. The first attachment is a summary of school goals solicited for the 1998-99 school year. The second through fourth attachment contains the cover letter, template, and summary of responses from the 1999-2000 planning exercise.

In addition, I will hear re-iterate the three components that we discussed as being potential focuses for a comprehensive IUPUI enrollment management effort:

1. Campus/Program Capacities - The physical, fiscal, and human resources required to accommodate an appropriate mix of students to fill our current and future programs

2. Support Services - The types of enrollment, academic, and student support service required to attract, recruit, engage, and promote success for the types of students we currently and prospectively enroll

3. Curriculum - Articulation, analysis, and 'gap-smoothing' of the curricular interdependencies among academic schools and programs engendered by program requirements.
